

AUDIO

Dongle Dante® sortie analogique 2x0 XLR 2 Canaux - DAI-D5-2X0

DAI-D5-2X0 is an adaptor that can receive an analogue audio signal, convert it into a digital signal and transmit it over a Dante® network.

It includes an RJ45 port for connecting and communicating with the DANTE network, and two 20 cm cables with female XLR connectors.

- › Plug and Play
- › 24-bit audio support
- › 2X0 audio channels
- › Consumption PoE (IEEE802.3af)
- › Sampling frequency 44.1kHz, 48kHz, 96kHz/24bit
- › Dante® device latency 1,2 ou 5ms (configurable via Dante® controller)
- › Max signal level +24 dBu
- › Frequency Response 20Hz to 20kHz(-/+0.5dB)
- › Impedance 20k Ohm balanced
10k Ohm unbalanced
- › Dynamic Range >100 dB
- › Signal to Noise Ratio >100 dB
- › THD <0.01% @+4 dBu

Weight (g)	145g
Dimensions (WxHxD) (mm)	30 x 28 x 114
Consumption	802.3af PoE 3.15W(Max)
