

Bloc 4 Prises pilotable en IP - PCP410

- › 4 x 10A IEC C13 female power output
- › 1x 10A IEC C14 male universal power input
- › Monitoring and statistics of voltage, current, power and energy consumption data
- › Switch monitoring, current and energy consumption monitoring
- › Remote monitoring, control and configuration via Web-GUI
- › 2 redundant TCP/IP backup network ports to provide uninterrupted network services
- › Security guarantee: overload protection, interference filtering, wiring error protection, remote connection verification
- › Supports multiple network protocols and IoT protocols
